## Hypervigilant Hypermarkets

### Carrefour comes to Romania stocking high tech security

When Carrefour, one of the largest food retailers in the world, expanded its presence of hypermarkets across

three continents, they hired security system integrator UTI to establish loss prevention systems within their unique shopping environment. The security company met the challenge, providing one of the most secure hypermarkets, equipped with state-of-the-art video surveillance equipment from American Dynamics™.

Created in 1959, Carrefour has grown from a single supermarket in France's Haute-Savoie region to more than 11,080 stores in 29 countries.
