

# victor and VideoEdge 6.0

## New large-format display lineup for end-to-end Command Center video wall deployment with victor & VideoEdge v6.0

The Command Center extension of victor VMS allows security professionals greater visibility and flexibility to manage critical video, events, alarms and web feeds across multiple geographic locations and thousands of cameras utilizing a large format video wall leading to increased situational awareness and decreased response time.

By leveraging the existing capability of the victor VMS with a new line of industrial-grade, 24/7 use, large format display and security monitors, American Dynamics now offers an end-to-end video wall experience.

## Cost-effective and easy-to-install

Video wall solutions are traditionally complicated to specify, procure and deploy, often requiring custom 3rd party solutions. By offering an enterprise VMS agent alongside tested and trusted victor workstations, input devices, large format displays and mounting hardware, American Dynamics offers an application-specific, cost-effective, easy-to-install video wall solution. Full PTZ keyboard and virtual matrix support allow seamless operator workflows from the security operator's workstation to the video wall in a familiar victor workspace.

American Dynamics large format displays are available in 43", 55" and 65" sizes, bezel-less or thin-bezel formats with up to UHD 4K resolutions allowing you to create a 110" or 165" 4K image in a2x2 or 3x3 configuration. These displays may be tiled or extended creating adaptable configurations to fit the use-case or physical space constraints of the customer. Industrial-grade metal cabinets, 24/7 operation certification and 3-year warranties ensure mission-critical reliability.

## Key Features

- American Dynamics Video Wall displays up to 165" 4K per canvas
- victor Agent Workstations up to 4 canvases per workstation
- victor Client Workstations
- American Dynamics 2089 and Surveillance Keyboard

# Features and Benefits

## C-CURE 3.0 Unified Release

victor and VideoEdge v6.0 are offered as a fully unified video surveillance and access control solution- Existing Unified customers will now have access to all the new victor and VideoEdge features and enhancements since the last Unified release v5.6, including direct camera configuration, additional Illustra AI server and edge analytics, Illustra body worn camera integration and improved forensic searching.

## Edge Assisted Re-ID Analytic

VideoEdge NVRs can now leverage the edge analytics capability of Illustra cameras- VideoEdge customers using Pro Gen4 or Flex Gen4 cameras will be able to increase the number of channels of Intelligent Person Search by offloading some of the processing requirements to the camera. This results in greater scalability and more available Re-ID channels on fewer NVRs.

## Fall Alert Analytic

victor VMS can now receive Fall Alerts from Illustra AI server- Security operation centers concerned with slip-fall liability and public safety can now configure real-time alerts from AI-based fall detection. These alarms may be tied to events in victor VMS, enabling the SOC operator to respond to emergencies quickly or begin a forensic, investigative search.

## Illustra Pro Gen4 Multisensor and Flex Gen4 Cameras

VideoEdge camera handlers have been updated for the new Multisensor and Flex Gen4 cameras- The Illustra Pro Gen4 Multisensor is effectively four cameras in one, offering up to three streams per channel, multi-channel alerts and multi-channel analytic metadata. The Flex Gen4 series of cameras brings video analytics to the mid-tier market.

## VideoEdge OS Upgrade

Operating System Upgrade-The VideoEdge operating system update brings several performance and security enhancements. Please note that VideoEdge NVRs must be running at least v5.7 before upgrading to v6.0.

## Ordering Information

Model Number	Description
Ultra-Narrow-Bezel Monitors	
ADLCD43MB4K	43" LCD UHD 4K Monitor with HDMI, DP, DVI, VGA
ADLCD55MB4K	55" LCD UHD 4K Monitor with HDMI, DP, DVI, VGA
ADLCD65MB4K	65" LCD UHD 4K Monitor with HDMI, DP, DVI, VGA
Razor-Narrow-Bezel Monitor	
ADLCD55VWBHD	55" LCD FHD 1080p, HDMI, DP, DVI, VGA
Optional Accessories	
ADWP4370B	Precision wall mount for 43"-70" displays, Black
ADVC-VWC-5MCBL	victor WS video wall control 5M cable kit (USB to RS232)

Download the victor and VideoEdge v6.0 software from the American Dynamics website under Software Downloads. Please note that you will need to log into the system with your email address and password.
